Policy statement Crowne Plaza Antwerpen

Crowne Plaza Antwerpen finds it important that the hotel contributes to a sustainable working environment. In order to achieve this, we have made several choices and plans for the future. The efforts have resulted in the possession of the Green Key since 2017. This shows that Crowne Plaza Antwerpen is a hotel that operates in a socially responsible manner, with a focus on sustainability. Unlike other countries, Belgium has only one level of the Green Key certification.

Green features

We have a waste policy which includes the separation of organic waste, residual waste, PMD, cardboard / paper, glass, batteries, metal and lamps. We also serve Fairtrade tea and organic wine in our restaurant ANNA. To make it even more sustainable, our electricity is derived from ‘green power’ and LED lighting is installed throughout the hotel. Besides that, we want to encourage our guests to be environmentally conscious too. Therefore, we rent out bikes and offer various walking routes. Furthermore, all guest and staff bathrooms are equipped with automatic taps, and all our windows have been renewed with high-performance insulating glass.

Moreover, all heavy motors in the hotel are equipped with frequency control and we have a building management system. The water consumption is reduced by faucet aerators. The 3 guest lifts have a renewed operating system. Within the company, we regularly offer training courses for our employees to make them aware of our environmental policy.

Future plans

Our goal is to become even more sustainable in the future and therefore, we have made the following plans. After filtering, the reuse of sanitary water (bathtub, shower and sink) will be possible in cooperation with water-link. The central heating system will be replaced and split over 2 locations. As a result, there will be less heat loss due to very short distances. Finally, in the near future we will install new motors in all 5 elevators and increase the amount of automatic light switches in all storage areas.
With this policy we, as Crowne Plaza Antwerpen, are contributing to a more sustainable and environmentally conscious environment.
